

PRESS RELEASE 22 JULY 2019

## **Italeaf: the TerniEnergia's digital company Softeco launches a energy consumption analysis service for ENAV, with a dedicated platform**

**TerniEnergia**, a smart company listed on the Italian Stock Exchange's electronic share market (MTA) and part of the **Italeaf** Group, announces that the Group's digital company Softeco obtained a contract from ENAV, the company that manages civil air traffic in Italy, for the supply of a platform dedicated to the analysis of the consumption data of the individual sites where power is delivered to the customer (POD) and of the cost data connected to the contract stipulated with energy suppliers.

The aim of the supply is to guarantee to the energy management sector of the company a decision support service, able to optimize energy consumption and to promote actions designed to increase consumption efficiency. Softeco will implement a tailor made version for ENAV of the Energy Retail solution, designed specifically for Energy Managers, to allow and optimize the analysis of energy consumption and costs incurred. The Energy Data Manager (EDM) module allows, in fact, the analysis of the consumption of all the users included in the supply through the acquisition of data both from the fiscal meter and from other meters possibly present in the different branches of the system. It is also possible to recalculate the value of the different components of the supply and compare them with those present in the invoice received from the supplier.

Softeco will provide the basic hardware and software architecture, the data back-up service, the connectivity, the system management service and the help-desk service.

EDM is the solution for Energy Managers that is the result of Softeco's more than ten years of market experience, thanks to its package of features designed directly in the field, allows a high automation of business processes - control of costs and consumption - through the creation of reports designed ad hoc.

EDM also interfaces with the information systems of the authorities (SII, ARERA, GSE, Terna, ...) and is compatible with cloud and on-premise infrastructures.

**TERNIENERGIA (TER. MI)**, established in September 2005 and part of the Italeaf Group, is the first Italian global technological enabler, committed to bringing energy solutions and efficient recovery of integrated and sustainable resources to the world. Organized into two strategic business lines (Assets and Smart solutions and services), with about 300 employees and a geographical presence worldwide, with operative and commercial offices, TerniEnergia develops innovative solutions, products and services based on digital and industrial technologies for the energy supply chain, grids, smart mobility, industrial automation and the recovery of marginal resources. TerniEnergia, also through its subsidiaries (Softeco Sismat, Greenled Industry, GreenAsm, GreenAsm, Purify, Wisave, Ant Energy), pursues the objectives of increasing energy production from renewable sources, saving energy and reducing emissions and actively participates in the energy revolution of distributed power generation and smart grids, with innovative digital solutions.

TerniEnergia is the ideal partner for large utilities, distribution operators and network operators, energy producers, public administrations, industrial customers and investors who intend to realize large projects for the production of renewable energy, modern systems and plants with high energy efficiency, solutions for the management and maintenance of infrastructure and electrical installations. TerniEnergia has completed its transformation from a leader in the international photovoltaic market into a smart energy company and technological enabler for the sustainable use of resources through a complete commercial offer of solutions, the development and supply of digital technologies and the creation of "intelligent" services and solutions aimed at public and private customers in emerging sectors.

TerniEnergia is listed on the MTA of Borsa Italiana.
